

ABOUT ME

Second-year Computer Science student interested in Artificial Intelligence and real-world problem solving. Experienced in building AI-driven and web-based applications, including clinical decision systems and safety platforms. Currently learning machine learning and agentic AI, and seeking internship opportunities to gain hands-on experience.

EDUCATION

SRM Institute of Science and Technology, Kattankulathur <i>Bachelor of Technology in Computer Science and Engineering (Core)</i> (CGPA: 9.19)	Chennai, India 2024 – 2028
Central Board of Secondary Education (CBSE) <i>Higher Secondary Certificate (Class XII)</i> (Percentage: 85.8%)	Chennai, India 2023 – 2024
Central Board of Secondary Education (CBSE) <i>Secondary School Certificate (Class X)</i> (Percentage: 92.8%)	Chennai, India 2021 – 2022

SKILLS

- **Programming:** C++, C, Java, Python
- **Core Concepts:** Data Structures, Object-Oriented Programming
- **Web Development:** HTML, CSS, JavaScript, Node.js, Express.js, REST APIs
- **Databases:** MySQL
- **AI & Tools:** BioBERT, scispaCy, XGBoost, n8n
- **Tools:** Git, phpMyAdmin
- **Soft Skills:** Problem Solving, Teamwork, Communication

PROJECT HIGHLIGHTS

MediMind – AI-Based Clinical Decision Support System

- Developed an AI-driven system to analyze unstructured medical reports and extract key clinical information
- Implemented document parsing using PyMuPDF and medical entity extraction using BioBERT and scispaCy
- Built a prediction model using XGBoost to identify potential disease risks
- Integrated LLMs to generate concise clinical summaries for improved clinical decision-making
- Designed a modular pipeline architecture for scalability and efficient data processing

Campus Compass – Lost & Found Management System

- Developed a full-stack web application for managing lost and found items across a college campus
- Built with Node.js, Express.js, and MySQL – featuring JWT authentication, photo uploads, and a live status board
- Implemented relational database schema with 5 tables, JOIN queries, and a REST API with 11 endpoints

Abhaya – Smart Emergency Safety System

- Developed a web-based safety application using HTML, CSS, and JavaScript, featuring one-tap SOS alerts for rapid emergency response
- Implemented real-time location tracking using the Geolocation API and visualized data with Leaflet.js for interactive map-based monitoring
- Built a trip tracking system enabling continuous live location sharing with guardians
- Designed a community-driven unsafe zone reporting module to identify and map high-risk areas, enhancing public safety awareness

Peltier-Based Smart Face Mask

- Designed and developed a smart face mask integrating a Peltier module and sensors to enable automated temperature control
- Focused on improving user comfort under varying environmental conditions through real-time thermal regulation
- Recognized for innovation and real-world applicability at SRM Institute of Science and Technology

VR-Based Tourism Experience (Samsung PRISM Ideathon)

- Led and coordinated a 5-member team to design a VR-based tourism solution enabling virtual travel experiences
- Focused on improving accessibility for physically challenged individuals and enhancing learning for school students
- Shortlisted among the top 20 teams from 120+ teams (450+ participants) in the final round

Tourism Planning Application for Goa

- Developed an application that plans daily itineraries and travel packages based on trip duration and user preferences
- Enabled users to organize activities, optimize daily schedules, and explore curated tourism packages for Goa
- Designed to improve travel planning efficiency and overall user experience

ACHIEVEMENTS

Best Project Award (SRM Institute of Science and Technology) — Designed a Peltier-based smart face mask with sensor integration and automated temperature control; awarded Best Project for innovation and real-world applicability among **80+ participants**.

Samsung PRISM Metaverse Ideathon — Finalist — Led and coordinated a **5-member team** shortlisted among the **top 20 teams** from **120+ teams (450+ participants)** for proposing a VR-based tourism solution enabling virtual travel experiences for physically challenged individuals and school students.

Hackstreet 4.0 — Pentathlon 3.0 (NextGen AI, SRM IST) — Top 9 Finalist — Presented **MediMind**, an AI-based clinical decision support system, and advanced to the final round among **100+ participating teams**.

QWIK INNOVATE Ideathon 2026 (Qwiklabs Developer Club, SRM IST) — Top 50 Team — Shortlisted among **100+ teams**.

CERTIFICATIONS

- **Object Oriented Programming** — NPTEL
- **Java Programming** — NPTEL & MyCaptain
- **Operating Systems** — NPTEL
- **Agentic AI and Web Development Workshops**

EXTRACURRICULAR ACTIVITIES

• **Volunteer, Directorate of Alumni Affairs** — SRM Institute of Science and Technology 2025 – Present
Researched and shortlisted alumni based on event requirements; pitched events and supported planning and execution activities.

• **Competitive Chess Player** — Represented school at national-level tournaments; participated in inter-school and state-level competitions, demonstrating strategic thinking, focus, and disciplined preparation.
