## ABOUT ME

Computer Science undergraduate with experience in AI/ML, backend, and full-stack development. Skilled in Java, Python, Spring Boot, Node.js, REST APIs, and machine learning, with a strong interest in building scalable software solutions.

## EDUCATION

|                                                                                                                           |                               |
|---------------------------------------------------------------------------------------------------------------------------|-------------------------------|
| <b>SRM Institute of Science and Technology, Kattankulathur</b><br>B.Tech in Computer Science and Engineering   CGPA: 9.28 | Chennai, India<br>2024 – 2028 |
| <b>CBSE</b><br>Higher Secondary Certificate (Class XII)   85.8%                                                           | Chennai, India<br>2023 – 2024 |
| <b>CBSE</b><br>Secondary School Certificate (Class X)   92.8%                                                             | Chennai, India<br>2021 – 2022 |

## TECHNICAL SKILLS

- Languages: C++, Java, Python, C, JavaScript
- Frameworks: Spring Boot, Node.js, Express.js, Kafka, REST APIs
- AI/ML: BioBERT, scispaCy, XGBoost, LLMs, n8n
- Databases/Tools: MySQL, H2, JPA, Git, Maven, PyMuPDF, phpMyAdmin
- Core: OOP, DSA

## PROJECTS

### MediMind --- AI Clinical Decision Support System

- Developed an AI-powered clinical decision support system to automate analysis of unstructured medical reports
- Extracted clinical entities using BioBERT and scispaCy from PDF medical records
- Predicted disease risks using XGBoost and generated concise clinical summaries with LLMs
- Designed a modular pipeline enabling scalability across multiple medical specialties

### Campus Compass --- Lost & Found Platform

- Developed a full-stack Lost & Found platform using Node.js, Express.js, and MySQL
- Implemented JWT authentication, image uploads, and live status tracking
- Designed a normalized relational database with five tables and built 11 RESTful API endpoints

### Abhaya --- Smart Emergency Safety App

- Developed a smart emergency safety application with one-tap SOS alerts
- Implemented live GPS tracking using Leaflet.js for real-time location sharing
- Added crowd-sourced unsafe-zone reporting to improve community safety awareness

### JPMorgan Chase & Co. Software Engineering Job Simulation

- Built a Spring Boot backend application through a hands-on software engineering simulation
- Integrated Apache Kafka for asynchronous transaction processing and messaging workflows
- Implemented transaction validation, persistence using Spring Data JPA with an H2 database, and external REST API integration
- Developed a REST controller exposing a GET endpoint for retrieving user account balances

# ACHIEVEMENTS

---

- **Hackstreet 4.0 Pentathlon, NextGen AI — Top 9 Finalist**

MediMind advanced to finals out of 100+ teams

- **Samsung PRISM Metaverse Ideathon — Finalist**

Led 5-member team into top 20 of 120+ teams (450+ participants)

- **Best Project Award — SRM IST**

Developed a Peltier-based smart face mask with automated thermal control, selected as the best project among 80+ members

# CERTIFICATIONS

---

- JPMorgan Chase & Co. Software Engineering Job Simulation — Forage
- Object Oriented Programming — NPTEL
- Java Programming — NPTEL & MyCaptain
- Operating Systems — NPTEL
- Agentic AI Workshop — Hands-on training in agentic workflows and automation using n8n
- Web Development Workshop — Practical full-stack development with Node.js and REST APIs

# EXTRACURRICULAR ACTIVITIES

---

- **Volunteer, Directorate of Alumni Affairs, SRM IST** — Shortlisted alumni, pitched events, and supported end-to-end planning and execution. 2025 – Present
- **Competitive Chess Player** — National and state-level tournaments; demonstrates strategic thinking and disciplined preparation.
